DUBA LOKESH KUMAR

Java Full Stack Developer
Hyderabad, India | +91 8978772539 | dubalokeshkumar6550@gmail.com | linkedin.com/in/lokeshkumarduba | github.com/DubaLokeshKumar6550

SUMMARY

Java Full Stack Developer with production-style internship experience building REST APIs and microservices on Spring Boot, Hibernate, and MySQL, with React JS front ends and basic knowledge of AWS. Skilled in Java, Python, and SQL. Built a Stripe-integrated payment auditing module and a full banking transaction system, applying layered DAO-Service-Controller architecture and SQL performance tuning. Experienced with MS Office tools for documentation and reporting. SQL-certified, Agile-trained, and focused on writing clean, testable, maintainable code — seeking a full-time Full Stack Developer role.

TECHNICAL SKILLS

Languages: Java, Python, SQL
Backend & Frameworks: Spring Framework, Spring Boot, Hibernate ORM, Microservices, JSP, Servlets, JDBC, Embedded Tomcat, Maven
Frontend: React JS, HTML5, CSS3, JavaScript (ES6)
Cloud: AWS (EC2, S3, RDS)
Databases: MySQL (query optimization, indexing, schema design)
Tools & Practices: Git, GitHub, Postman, Eclipse, VS Code, REST APIs, MVC, OOP, SOLID, Agile/Scrum, MS Office (Word, Excel, PowerPoint)

PROJECTS

Payment Integration System Spring Boot · Microservices · React JS · Stripe API · AWS · MySQL · REST

- Built a transaction logging and auditing module in Spring Boot that captured payment events in real time and flagged transactions exceeding defined risk thresholds before settlement.
- Designed the payment auditing module as an independent microservice deployed on AWS EC2, with MySQL on RDS.
- Integrated the Stripe API to support multiple payment workflows, including one-time charges, refunds, and webhooks, using a layered DAO-Service-Controller architecture for maintainability.
- Developed a React JS front end to display transaction logs and audit flags, consuming the Spring Boot REST APIs.
- Tuned MySQL queries and added targeted indexes to reduce transaction-lookup query time under simulated high-volume load.

Bank Management System Java · Hibernate · MySQL · OOP

- Designed a normalized MySQL schema for accounts and transactions and built the persistence layer with Hibernate ORM, supporting deposit, withdrawal, and transfer operations.
- Enforced data integrity through validation and OOP-based encapsulation, preventing invalid or duplicate transactions across deposit, withdrawal, and transfer operations.

EXPERIENCE

Java Full Stack Development Intern — JSpiders, Hyderabad 2026

- Built and consumed REST APIs with Spring Boot as part of an Agile/Scrum team, validating endpoint reliability through structured Postman test suites.
- Developed and integrated React JS components with backend REST APIs to deliver responsive user interfaces.
- Wrote and optimized MySQL queries, applying indexing strategies that improved data retrieval performance in team benchmarks.
- Followed DAO-Service-Controller layered architecture and clean-code standards through peer code review, using Git/GitHub for version control.

EDUCATION

B.Tech, Electronics & Communication Engineering 2021 – 2025
Mother Teresa Institute of Science & Technology, Sathupally — CGPA 7.7/10

Intermediate (MPC) 2019 – 2021
VKDVS Raju Junior College, Aswaraopeta — CGPA 8.8/10

CERTIFICATIONS

- Infosys Certified SQL Developer
- JSpiders Java Full Stack Development Certification
- Data Science Fundamentals — Edzeeta
